
ACTUARIAL MANAGER

Company: Manulife Business Processing Services

Location: UP Ayala Technohub, Commonwealth Avenue, Quezon City, Philippines.

The Actuarial Manager will be responsible for overseeing a group of actuarial associates performing valuation, GGY Axis liability modelling, model risk management or experience studies for Manulife's global operations. He/she would gain the opportunity to build strong leadership skills, while broadening knowledge of the global Manulife actuarial function, and having a key role in building a high performing actuarial function in MBPS. Candidates with higher qualifications will be considered for the role of Director.

Key Accountabilities:

- Manage and develop a team of 8 or more actuarial associates of various experience and skill levels.
 - Set clear objectives and actively manage performance relative to business expectations.
 - Establish an environment of openness and trust and foster a high level of engagement.
 - Ensure that associates are provided with assignments which help to address development goals.
 - Provide sound guidance to help associates solve problems encountered in actuarial tasks.
- Act as a point of contact with multiple internal business clients, addressing issues that arise and maintaining positive client relationships.
- Leverage technical expertise to enhance capabilities of the team and influence methodologies and decisions of the business.
- Support the development and implementation of programs to benefit the Actuarial Services Division and MBPS as a whole.

Qualifications:

The candidate:

- Bachelor's Degree in Mathematics, Actuarial Science, or Statistics.
- At least six (6) years of experience in actuarial roles of increasing responsibility would be preferred.
- Require at least ASA, or equivalent designation from another actuarial association; FSA would be preferred.

Technical Skills:

- Strong quantitative, analytical, and problem solving skills.
- Advanced knowledge of actuarial mathematics; familiarity with a variety of insurance products (e.g., life, annuities, disability/LTC, etc.) and reserving methods (IFRS, NAIC).
- Advanced ability with GGY AXIS and strong knowledge of modelling principles.

To apply, please send your resume to Ferdi Marc Cacho (ferdi_marc_cacho@manulife.com). Thank you.
